

ADM - Indoor/Outdoor Speaker Amplifier Stations

ADM - Indoor/Outdoor Speaker amplifier stations offer monitoring features and 15 watt amplifier. The stations interface with the ADM control unit exchanging information that includes station status and the status of associated speakers. The ADM speaker amplifier stations also are equipped with automatic volume control (AVC).

Specifications

Power Input	90-240VAC 50/60 Hz
Output	15 Watt into 8/15 ohm
Gain	58 dB nominal adjustable
Frequency Response	250-15,000 Hz +/- 1.5 dB
Distortion	Less than 1% THD at 15 Watts
Input impedance	50,000 ohm nominal
Output impedance	4, 8, 16 ohm
Control	Speaker volume
Temp. Range	-30° C to +70° C
Dimensions	465L x 265W x 270D (mm)

Features:

- Designed for remote areas where handset stations are not warranted
- AVC automatic volume control of speakers based on ambient noise
- self diagnostics monitoring of station, speaker voice coil & cable
- UL approved

Model Numbers

- K-611 ADM Indoor Speaker Amplifier Station
- K-612 ADM Outdoor Speaker Amplifier Station
