

FEATURES

- One line balance unit must be installed near the approximate electrical center of each TOUCHPHONE system.
- It optimized the page and party lines by providing a balance load thereby eliminating hum, noise and feedback on the system.
- PCB-302 module provides five 33 Ohm balance resistors for the party lines and a variable sidetone adjustment potentiometer for the page line.
- LB-101 has an enclosure of 1.6mm (16 gauge) galvanized sheet steel with baked ivory polyurethane finish. The unit complies with NEMA12 and NEMA4X standards and is shock-resistant, dust-proof and corrosion resistant.
- Approved by UL, CSA, Class I, II, Division 2.

SPECIFICATIONS

Page	12 ohm – 33 ohm
Party 1-5	16 ohm – 33 ohm
Dimensions	120W x 170H x 60D (mm)
